

Encouraging AI adoption by EU SMEs

April 2, 2021

[Dirk Auer](#)

In a [new paper](#) published by the Progressive Policy Institute, ICLE Senior Fellow Dirk Auer and PPI's Caleb Watney make the case that while the EU desires to be at the forefront of developing regulations to manage emerging issues relevant to artificial intelligence, the European Commission's leadership have failed to grapple meaningfully with the significant tradeoffs that regulation of these new technologies entails.
